

GEA Westfalia Spare Parts - Datasheets & Reference Photos

Prepared for RFQ / supplier confirmation. These are procurement reference datasheets based on the supplied item list and public product references. They are not official OEM datasheets.

Item	GEA P/N	Description	Brand	COO
1	0015-0082-000	LUBRICATING GREASE	GEA Westfalia	Germany
2	0011-6207-000	GROOVED BALL BEARING	GEA Westfalia	Malaysia
3	0011-7304-250	ANGULAR CONTACT BALL BEARING	GEA Westfalia	Germany

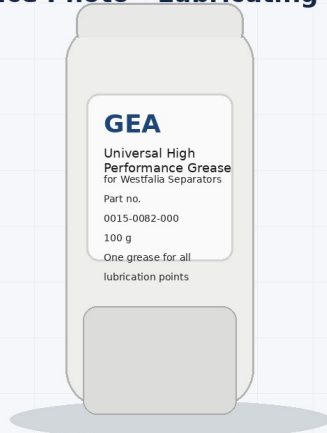

Important supplier confirmation required

For order use, request official GEA part confirmation, certificate of conformity, country of origin certificate, current packing photo, and actual datasheet/SDS where applicable. Bearing series dimensions are reference dimensions only and must not override OEM specifications.

Item 1 - LUBRICATING GREASE

Universal / separator lubricating grease, procurement reference datasheet

Reference Photo - Lubricating Grease

Illustrative image for RFQ use. Confirm actual OEM packing.

Brand: GEA Westfalia
Part No.: 0015-0082-000
COO: Germany

*Reference photo/illustration for identification only.
Confirm actual OEM packing label and part marking
before order.*

Parameter	Reference / requirement
Product category	Lubricating grease / Molykote-type grease for separator lubrication points
GEA part number	0015-0082-000
Known public reference	Listed as MOLYKOTE-GREASE / GREASE, GENERAL PURPOSE
Typical package	100 g tube/cartridge - confirm against supplier quotation
Application	Lubrication points on GEA Westfalia separator equipment, as per OEM manual
Country of origin	Germany
Incoterm / delivery	DDP Singapore; lead time 8 weeks
Required supplier documents	COC, COO, SDS/MSDS, shelf-life/expiry date, batch number, OEM packing photo

Engineering / procurement note: Exact base oil, thickener, NLGI grade, operating temperature and food-grade approvals were not confirmed from public OEM data. Supplier must provide official SDS/MSDS and GEA part confirmation before order.

Suggested RFQ line wording:

Supply genuine GEA Westfalia spare part 0015-0082-000 - LUBRICATING GREASE. Quote to include OEM packing, COC, COO, datasheet/SDS where applicable, lead time, warranty, and actual product photos before shipment.

Item 2 - GROOVED BALL BEARING

Deep groove / grooved ball bearing, procurement reference datasheet

Reference Photo - Grooved Ball Bearing

Illustrative image for RFQ use. Confirm actual OEM packing/markings.

Brand: GEA Westfalia

Part No.: 0011-6207-000

COO: Malaysia

*Reference photo/illustration for identification only.
Confirm actual OEM packing label and part marking
before order.*

Parameter	Reference / requirement
Product category	Single row deep groove ball bearing / grooved ball bearing
GEA part number	0011-6207-000
Probable bearing series	6207 - confirm exact OEM variant before substitution
Standard 6207 dimensions	35 mm bore x 72 mm OD x 17 mm width
Public stock reference	Westfalia; gross/net weight 0.572 kg; type OSD 6
Function	Radial bearing support; may accept limited axial load depending on arrangement
Country of origin	Malaysia
Incoterm / delivery	DDP Singapore; lead time 8 weeks
Required supplier documents	COC, COO, OEM packing photo, bearing marking photo, clearance/cage/seal confirmation

Engineering / procurement note: Do not replace with a generic 6207 unless the equipment manual and supplier confirm clearance, cage, seal/open type, lubrication and tolerance class.

Suggested RFQ line wording:

Supply genuine GEA Westfalia spare part 0011-6207-000 - GROOVED BALL BEARING. Quote to include OEM packing, COC, COO, datasheet/SDS where applicable, lead time, warranty, and actual product photos before shipment.

Item 3 - ANGULAR CONTACT BALL BEARING

Angular contact ball bearing, procurement reference datasheet

Reference Photo - Angular Contact Ball Bearing

Illustrative image for RFQ use. Confirm actual OEM packing/markings.

Brand: GEA Westfalia

Part No.: 0011-7304-250

COO: Germany

*Reference photo/illustration for identification only.
Confirm actual OEM packing label and part marking
before order.*

Parameter	Reference / requirement
Product category	Single row angular contact ball bearing
GEA part number	0011-7304-250
Probable bearing series	7304 - confirm exact OEM variant before substitution
Standard 7304 dimensions	20 mm bore x 52 mm OD x 15 mm width
Load type	Combined radial and one-direction axial load capability
Critical details to confirm	Contact angle, matched/universal pairing, cage material, clearance/preload, open/sealed type
Country of origin	Germany
Incoterm / delivery	Not stated in image; confirm with supplier
Required supplier documents	COC, COO, OEM packing photo, bearing marking photo, clearance/preload and contact angle confirmation

Engineering / procurement note: Angular contact bearings are more sensitive to correct arrangement/preload than ordinary deep groove bearings. Confirm exact OEM variant and installation orientation before purchase/use.

Suggested RFQ line wording:

Supply genuine GEA Westfalia spare part 0011-7304-250 - ANGULAR CONTACT BALL BEARING. Quote to include OEM packing, COC, COO, datasheet/SDS where applicable, lead time, warranty, and actual product photos before shipment.

Source Notes

- Partfinder Marine lists GEA Westfalia part 0015-0082-000 as MOLYKOTE-GREASE.
- NATO part reference lists 0015-0082-000 as GREASE, GENERAL PURPOSE with NSN 9150-12-369-4808.
- ST Marine lists 0011-6207-000 as Westfalia grooved ball bearing with gross/net 0.572 kg and type OSD 6.
- SKF public product pages describe 6207 as a single-row deep groove bearing and 7304 series as single-row angular contact bearing. Dimensions used are standard catalogue references, not confirmed GEA OEM variants.

Disclaimer: Public information for exact GEA spare part datasheets is limited. This datasheet pack is for RFQ/identification support only and should be validated by the authorized supplier or OEM before purchase, installation or substitution.
